**Subject:** Re: Response to comments

FYI - Dom's Q&A material on steel casing was just an excerpt from a larger response document that he is preparing. Knowing that this was going to be a contentious issue, I asked him to continue work on this (Deb McKean also saw this as an important effort and asked Dom to work on it). I just don't want folks to think that the Q&A materials are it. Dom and Rick have been very diligent. Determining where questions may arise and providing draft responses to those questions. I will forward to you whatever I get.

Hi,

Thanks for contacting them.

I do have Dom's comments that he prepared in mid-December on well construction. I will forward them in a separate email.

Gary

Gary,

Dom does not have access to the draft response to comments on well construction while he is away from the office. He will send a copy of the latest version of the responses on Monday, when he is back in town. He thought he may have already sent a copy of the comments to you. I've checked my files and I do not have a copy. I'll resend what ever I receive from him.

Also, have not heard anything from Ayn, but will keep trying.

Attached are copies of the draft Pavillion report and the draft Pavillion Phase V brief. Both provide explanations and interpretations of the data. The draft Pavillion report followed Phases III and IV and was the document that was posted online in December 2011. The draft Phase V brief was prepared by Dom and Rick, and others, and followed Phase V (obviously). The draft Phase V brief was NOT released, but the summary of results, a scaled back version (without explanations and interpretations), was. The summary of results was just that; it provided a discussion of methods and a summary of the Phase V data. I expect you have already seen these, but if not, I wanted you to have them because they provide a discussion of methods used and an interpretation of the results.

I'll keep trying to get copies of the responses to comments documents.
